# Read, sound, write, check – Template 1

Read/code	sound	write	check

1. Write the target words in this column. Ask the student to mark the graphemes in the word and sound them out.

2. This column should have lines according to the number of graphemes (spellings) in each word. Student writes graphemes on the lines and sounds them out. Next, fold the sheet on the dotted line.

3. Student says the sounds in the word and spells the word as he/she does. Then he/she opens the flap and checks if the word is spelled correctly.
